SUMMARY

As a passionate student in Artificial Intelligence and Machine Learning, I am currently pursuing my B.Tech at NIMS University with a CGPA of 8.65. My expertise includes developing machine learning solutions using tools like Python, TensorFlow, and OpenCV. I thrive on tackling complex problems and delivering impactful analytics solutions

EXPERIENCE

Machine Learning Intern

InTrainz

📅 10/2025 - 12/2025

Machine Learning Internship

- Built end-to-end machine learning pipelines including data preprocessing, feature engineering, model training, and evaluation
- Implemented supervised learning algorithms on real-world datasets to improve prediction accuracy and model reliability
- Cleaned and processed noisy datasets by handling missing values, outliers, and inconsistencies

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

NIMS University

📅 07/2023 - 06/2027

Class XII

Shaanthi Matriculation Higher Secondary School

📅 06/2022 - 05/2023

Class X

ARB International School

📅 06/2010 - 05/2021

KEY ACHIEVEMENTS

Patent No.: 202611000883

Designed an AI-powered smart glasses concept for intelligent assistance and real-time environmental interaction

SKILLS

Gmail

GitHub

Python

TensorFlow

OpenCV

Scikit-Learn

JavaScript

HTML

CSS

Numpy

Pandas

Matplotlib

Seaborn

EDA

Jupyter Notebook

Visual Studio Code

MATLAB

Simulink

PROJECTS

Online Fraud Detection System

Designed and implemented a machine learning classification system to detect fraudulent financial transactions.

Diabetes Prediction System

Developed predictive machine learning models for healthcare analytics using patient datasets.

Face Mask Detection System

Developed a real-time computer vision application using CNNs, TensorFlow, and OpenCV.
